

Product Usage Guide

Professional

BC012/3

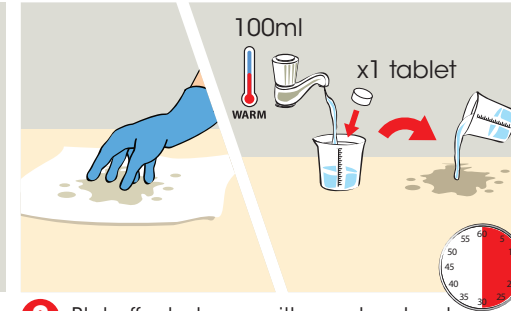

Cleaning potential outbreak of Norovirus

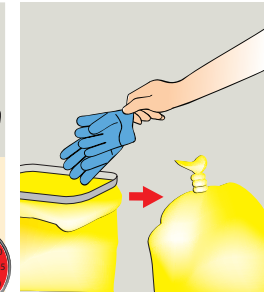

1 Wash hands with antibacterial soap and water then sanitise with alcohol gel hand rub.

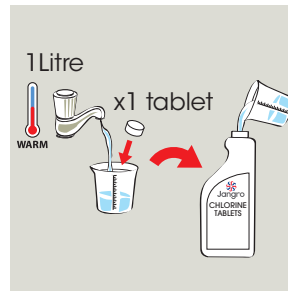

2 Use appropriate PPE as indicated in COSHH/REACH data and place Safety Signs.

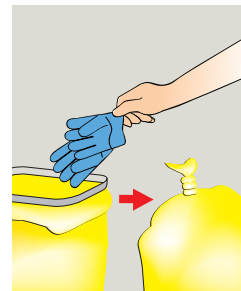

3 Blot affected area with an absorbent material, then pour on a solution of CHLORINE TABLETS diluted 10,000ppm (1 tablet per 100ml warm water). Leave for 30 minutes or longer if possible.

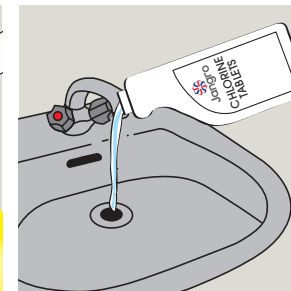

4 Place all waste in waste bag. Seal bag and place in appropriate area for disposal.

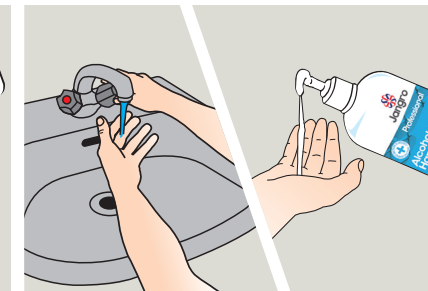

5 Disinfect again with a solution of chlorine tablets diluted 1000ppm (1 tablet per 1 litre warm water). Again leave for 30 minutes or longer if possible then wipe with a disposable cloth.

6 Place all waste in waste bag. Seal bag and place in appropriate area for disposal.

7 Dispose of solution in trigger sprayer bottle after each use/day.

8 Wash hands with antibacterial soap and water then sanitise with alcohol gel hand rub.

9 Remove safety signs.
